**The free web-based tool powered by Pneumax to design your pneumatic diagrams**

- Quick selection of ISO 1219 pneumatic symbols
- PNEUMAX products database integration: part numbers and technical features are efficiently connected with the relevant pneumatic symbols
- Guided part numbers configuration procedure
- Actuators complete part numbers creation including the desired stroke values
- Manifold and air treatment components assemblies can be easily configurable
- Multi-page diagrams
- Drawings can be downloaded as pdf and dxf files
- Bill of materials generation
